

## ART385 Design Document for Interaction Design

The ART385 Design Document emerges from a few different sources, including traditional [software design documents](#) and interface design workflows. The idea is to convey a design and code structures that run along with it.

### Re-state the Assignment

The assignment is to use a sensor to manipulate a light.

### Picture

### Reflections

For this assignment, I tried to keep it super basic. I still do not feel quite comfortable with the hardware quite yet, so I tried to use a code that we had learned in class and tried my best to get it running. I hope as we continue that I get the hang of it. I get frustrated that I cannot create something cool or interesting yet- but I hope to towards the end of the semester.
